WORK HISTORY

WEB DEVELOPER | 08/2021 to Current
Endava - Lodi, NJ

- Planned website development, converting mockups into usable web presence with HTML, JavaScript (ReactJS, GatsbyJS), AJAX, JSON coding and PHP(Wordpress)
- Provided front-end website development using WordPress, Hubspot and other editing software.
- Coded websites using HTML, CSS, JavaScript and jQuery languages.
- Engaged with clients to plan and optimize site issues and queries.
- Oversaw back-end development using PHP to maintain website integrity.
- Discussed site and app requirements with clients to produce actionable development plans.

SOFTWARE DEVELOPMENT ENGINEER | 01/2021 to 08/2021

Torrens University

- Updated old code bases to modern development standards, improving functionality.
- Collaborated with project managers to select ambitious, but realistic coding milestones on pre-release software project development.
- Discussed issues with team members to provide resolution and apply best practices.
- Planned and developed interfaces that simplified overall management and offered ease of use.
- Documented technical workflows and knowledge to educate newly hired employees.
- Translated customer requirements into written use cases.
- Participated in software field testing to verify performance of developed projects.

REACT NATIVE DEVELOPER | 07/2020 to 01/2021
Cafeto Software

- Developed software for desktop and mobile operating systems.
- Translated customer requirements into written use cases.
- Designed intuitive graphical user interfaces to improve user experience.
- Collaborated on stages of systems development lifecycle from requirement gathering to production releases.
- Designed reusable and reliable code for use within distributed cloud environments.
- Designed customized solutions for proposals to potential customers.

FULL STACK WEB DEVELOPER | 02/2011 to 06/2020
LAE International Education

- Developed efficient and maintainable software according to business objectives and needs of clients.
- Maintained complex technology infrastructure and collaborated with product team to implement new features and strategically plan for future products.
- Used Javascript, SQL and HTML to develop app-solutions.
- Liaised with rebranding experts to optimize websites for increased conversion rates.
- Used NodeJS, ORM and SQL/No-SQL to develop and manage databases.
- Developed functional databases, applications and servers to support websites on back-end.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.
